# TRACKER: LEAVESPRESS
## FUNCTIONAL DATA

Managing leaves of absence is time-consuming and tedious. It requires expertise in state and federal laws, benefit rules and payroll.

This service takes the compliance challenges off the hands of employers and **includes direct communication with employees about their leaves of absence.** This protects the employer from discrimination claims by keeping employee health information private from employer personnel.

## Technology

Our cloud-based technology uses CSIU FIS, which starts the algorythm process for product delivery. CSIU FIS Data Integration solves the challenge of manually manipulating data.

## WHAT WE OFFER

☑ Data collection and consolidation to capture historical leaves of absence.

☑ Establish proper measurement periods and methods.

☑ Workflow process creation and management.

☑ All required documents sent on behalf of employer.

☑ Approval or denial of leave based on federal and/or state guidelines.

☑ Document storage.

☑ Real-time reporting for employers to view leave requests, status of leave, and return-to-work status.
